Sorry!! I spoke to Nadine about this when we met about the training last week and did not mention it to you. In a nutshell, the conversation was:

1) In the 1994 Order we had required BDH to plug 15 injection wells they no longer planned to use as well as an additional 10 they were to have identified after the Order was issued. Back in those days, these were the only wells BDH no longer intended to use, but the rest of the injection wells were still active. That has all changed-now we want all remaining wells to be plugged. In addition, the wells listed in the 1994 Order are not necessarily the highest priority wells to be plugged (wells near homes on wells, wells with shallow standing fluid levels are higher priority).

2) [REDACTED]

EXEMPTION 5

I will run the letter by her! Thanks! Frank

Nicole-Yes, I know I ran a draft of this letter by you already but I decided to add info from the old consent order. You want to review? Also, given the legalities, should we involve Nadine? Thanks! Frank
